ABOUT ME

A Full stack Developer, who focuses on interactive design & A freelance designer focusing on typography, Responsive Design & User Friendly Designe.

SKILLS

- Flutter App Development
- **Version Control** using Git and Github
- Backend Integration (**Custom server, Suprabase, Firebase**)
- **App UI and component design**
- **Custom** UI Elements
- **Animations** (Animator, Tweening & Animation Events)
- Multi-user support with Firebase
- **Data scraping** and Manipulation
- **Monetization** (Subscriptions, Ads with Google Ads, AdMob)
- **User Authentication**
- **In-App Purchases**
- Web design and Development (html, css & its per-processor, javascript)
- Wordpress design and custom intregration
- Localization (**Multi-language Support & Text Management**)
- **CDN Integration** (Addressables, Remote Hosting, Firebase Storage)
- Api Integration (**MongoDB, SQL, Sqlite, NoSQL**)

EXPERINCE

I have strong experience in Android app development, building user-focused applications with clean interfaces and smooth functionality. Alongside this, I've worked across UI/UX design, web development, and WordPress customization, giving me a well-rounded skill set for creating complete digital products. I've delivered professional projects for both local and international clients and collaborated effectively as a freelancer to turn ideas into intuitive, high-quality mobile experiences.

SYNTAX DIGITAL **APP LEAD ENGINER** **AUG 2024 - CONTINUE**	As App Lead Engineer at Syntax Digital, I led end-to-end Flutter development — from UI/UX planning to production-ready code. I worked on API integrations, implemented CDN-driven optimization for faster load times, and used TensorFlow to introduce intelligent features into mobile apps. I partnered with the web team to maintain consistency across platforms and streamline the overall development workflow.
VISIONBIRD TECHNOLOGY **FRONTEND DEVELOPER** **JUNE 2023 - SEP 2024**	At Visionbird Technology, I worked as a Web and Graphic Designer, creating engaging user interfaces, brand visuals, and responsive web layouts. During this period (June 2023 – September 2024), I also explored Flutter development, contributing to early app prototypes and expanding my skills into mobile UI design.
4NDS NETWORK **WEBSITE DEVELOPER** **AUGUST 2022-MAY 2023**	At 4ND Network, I served as a UI/UX and Front-End Specialist, crafting responsive interfaces, refining design systems, and contributing to user-centered product improvements. I also had the chance to collaborate with experienced designers and developers, learning advanced workflows, accessibility standards, and practical design problem-solving.
5D TECH **GRAPHIC AND WEB DESIGNER** **APRIL 2021-AUGUST 2022**	At 5D Tech, I worked as the Graphic and Front-End Design Team Lead, managing projects, guiding designers, and delivering polished digital experiences. My role helped me strengthen my leadership, communication, and project-management skills while giving me hands-on experience in designing responsive websites and creative brand visuals.

APP DEVELOPMENT AND GIT

Over the past two years, I've focused on mastering the core pillars of mobile app development. Flutter, Dart, and Git/GitHub, showcasing my dedication to improving my skills in this field.

PRODIGENIUS	I created the Prodigenius app, using TensorFlow Lite to power AI-driven task prioritization and productivity tracking. The app analyzes task urgency, due dates, and preferences, offering smart recommendations to help users stay organized and efficient. TensorFlow Lite ensures fast processing, providing a smooth user experience.
TAPXI DRIVER & TAPXI PASSENGER	I developed the Tapxi Driver and Passenger apps, along with a dynamic web dashboard. Passengers can request and track rides in real-time, while drivers manage requests easily. The dashboard offers admins ride analytics and user insights, streamlining the ride-sharing experience.
INDEPENDENCE CARE	Built a caregiver management app with secure login, duty assignment, and real-time GPS tracking.Implemented reliable Clock In/Out functionality for accurate shift monitoring.Integrated an advanced admin dashboard for team oversight and performance tracking.Focused on smooth workflows, responsive UI, and optimized backend communication.
CHATLY (REAL-TIME CHAT APPLICATION)	Developed a real-time chat app using Flutter with seamless backend integration.Enabled text and image sharing with fast message delivery and cloud handling.Designed a clean, responsive, and minimal UI for better user experience.Implemented efficient state management for stable and scalable messaging.
EXPENSE TRACKER APP	Designed an intuitive expense tracking app featuring charts, category lists, and quick insights.Added add/delete features using a bottom sheet UI with undo actions for user convenience.Implemented local data storage using Shared Preferences for offline access.
GYM GUIDE ELITE	Gym Guide Elite is my first app on the Play Store. It offers 7-day exercise plans, customized food plans, and an AI trainer for personalized fitness guidance, making workouts and nutrition easier to follow.

WEBSITE DESIGN AND DEVELOPMENT

Over the years, I've built a solid foundation in both web design and development — working with HTML/CSS, JavaScript, and Git to create clean, user-friendly digital experiences. My experience with WordPress across various projects has also played a key role in shaping my portfolio and strengthening my creative workflow.
